DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1, 3, 4, 6, 17, 23, 30, 32 and 33 are rejected under 35 U.S.C. 102(a) as being anticipated by Lee (KR2004110711A).

Regarding claim 1, Lee discloses a microcomputer 10 for detecting motion in a video signal generated by a camera A and generating an OSD movement command in response to the detected video motion. In response to the OSD movement command, a microcomputer 30 moves the OSD to a new location. Although not explicitly shown, the microcomputers 10 and 30 inherently include the obtaining step, the detecting step, and the performing step as claimed.

Regarding claim 3, Lee inherently includes the claimed detecting step because the microcomputer 10 is able to detect any video change or movement displayed on the screen.

Regarding claims 4 and 6, Lee inherently includes the claimed state change amount calculation because the video motion is calculated based on two frame or field difference.

Regarding claims 17 and 23, note Lee's abstract.

Regarding claims 30, 32 and 33, see the corresponding rejections as set forth above.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 18-20, 24, 26, 27 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee.

Regarding claims 18-20, 24, 26, 27 and 29, Lee does not specify the OSD presentation schemes as claimed. It is recognized that the OSD microcomputer 30 in Lee is fully capable to perform all the claimed OSD presentation functions. Hence, it would have been obvious to one of ordinary skill in the art at the time that the invention was made to configure the microcomputer 30 of Lee to perform the well known functions as claimed. The modifications would have been considered obvious design choice.

Allowable Subject Matter

5. Claims 2, 7-12, 16, 25 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
